ADPICS - Change Order Number on Purchase Order Getting Set to an Incorrect Value

In the past, users, while processing a change order, were able to modify the associated purchase order in a manner which created incorrect data. For example, change order number. This occurred when a series of incorrect keys were pressed. The software has been modified to correct this problem.

This correction will be migrated to production on August 19, 1998. It will be available to users on August 20, 1998.
